

Benefits of Barcode

Smartline has created kits to allow for the upgrading of sites from RFID to barcode data systems. These kits are designed to be easily retrofitted to existing installed cabinets with minimal downtime for the site. Some of the key advantages of upgrading to barcode are:

- Future-proofing the addition of more cabinets
- Familiar usability
- Utilise existing barcodes
- Hands free scanning of scopes at cabinet
- Maintain more distance between endoscope and scanner at AER
- Improved flexibility and duplication of tags
- Improved learning curve
- More efficient replacement of lost or damaged tags
- Improved potential for future product integration
